01	O1	It is notice before and complicated. But in Dutch the i j is pronounced as ij (ijs). In xylofoon en yochurt it is 'i j without points', an y greek (pronouce in dutch ie grek). Thjis is difficult to explain therefore words with ygreek are diffeicult to spell in correct dutch.	It would be so much better when de pronouncing of the Y in spelling the words would be ie grek.	
02	07	C is difficult to see in small letter		
03	07	Like in the games with calculate the first level had to be the most simple one The third level the most difficult one	First level words till 5 letters, without y Or english words like jeep Second level words 6 letters and more + common but difficult words like yochurt and jeep Thirt level: new difficult words like quickstep, xylofoon, advocado	
12		FAUN has no meaning in dutch	Delete	
13	26	Letters op de loop: an easy game. Would it be beter in range of the first games?
